Career Objective

Execution-focused Computer Science and Engineering student specializing in AI/ML. Possesses hands-on technical expertise building production-style backend architectures, structured data pipelines, and NLP classifiers. Highly proficient in Python, FastAPI, and machine learning frameworks. Seeking an engineering internship to contribute to active repositories, optimize application routing channels, and deploy scalable software solutions.

Education

Bachelor of Engineering in Computer Science & Engineering (AI & ML)	(2025–2029)
Chandigarh University, Mohali, Punjab	SGPA: 7.63
Senior Secondary Education (Class XII) — CBSE Board	(2024–2025)
Sadhguru Public Hr. Secondary School, Uttar Pradesh	Percentage: 73%
Secondary Education (Class X) — CBSE Board	(2022–2023)
Sadhguru Public Hr. Secondary School, Uttar Pradesh	Percentage: 86%

Projects

AI-Powered Communication Routing & Spam Classifier (Feb 2026)

Role: Machine Learning & NLP Engineer

- Architected an end-to-end NLP text processing pipeline to clean, tokenize, and vectorize text datasets using TF-IDF feature extraction.
- Trained and validated a Random Forest Classifier to distinguish system communications from risks with rigorous testing metrics.
- Deployed a live, real-time inferencing web interface using Streamlit to process message payloads with minimal latency.

Production-Style Patient Data Engine (Dec 2025)

Role: Core Backend Developer

- Developed a high-performance RESTful API using FastAPI to process, track, and modify relational patient health metrics.
- Enforced data schema validation, custom exceptions, and structured response parsing using Pydantic Data Models.
- Designed modular backend components utilizing modular APIRouter splits and structured lifecycle file system operations.

Predictive Medical Analysis & Classification Pipelines (Nov 2025)

Role: Data Science & ML Developer

- Engineered binary classification pipelines leveraging PyCaret and KNN algorithms to accurately detect anomalies in health datasets.
- Handled feature scaling, outlier elimination, and stratified splitting workflows to protect backend tracking from data leakage.
- Evaluated pipeline performance using industry-standard precision, recall, F1-scores, and ROC curves.

Skills

Technical Skills: Python, C++, C, FastAPI, Pydantic, Machine Learning, Scikit-Learn, PyCaret, NLP, DSA, HTML, JavaScript

Tools & Platforms: GitHub, Git, Streamlit, VS Code, Kaggle, LeetCode, Claude AI

Interpersonal Skills: Communication, Technical Problem-Solving, High-Velocity Execution, Adaptability

Achievements

- Secured the **Data Science / AI Engineer** internship selection track at Unessa Foundation through a competitive profile screening on Internshala (May 2026).
- Contributed to an open-source **Google Summer of Code (GSoC)** organization repository by submitting a verified pull request.

Certifications

- Programming Foundations with JavaScript, HTML and CSS — Duke University
- Introduction to Artificial Intelligence — Intel Corporation
- Generative Artificial Intelligence — LinkedIn
